*Thermal transmittance depends on the glazing package (with standard package its 0.5 W/m²K)

Choose your model

Security

RC2 

Feel Secure!

If You decide on Security Exclusive Line, You may be sure, You will be safer than ever. Windows in that version, are the products with RC2 burglary protection class. Equipped with 8 octagonal bolts* located on the whole circuit of the frame, allows on calling them the safest windows on the market.

*depending on the sizes of the window, max. 8 octagonal bolts.

Passive

0,64 
W/m²K

Heat gains in the winter and protection against heat in the summer!

Passive version, which is equipped with a triple glass, filled with krypton and additional usage of a warm swisspacer bar, allow on achieving thermal transmittance factor on a very low level - 0,64 W/m²K. What is more, thanks to the usage of two layers of low emission coating, thermal transmittance of the glass is not higher than 0.4 W / m²K. The **Passive** window meets the requirements of the ift Rosenheim Institute in passive houses.

Elegant

Window hardware with invisible hinges

The **Elegant** version is a window equipped with tilt and turn fittings, discretely hidden in a space between frame and sash. Thanks to the unique design of SELECT fittings, the hinges are invisible when the window is closed. Usage of such solution, allow on obtaining sash load capacity even up to 150 kg. What is more, **Elegant** version, thanks to the SELECT fittings, achieve a better thermal insulation than normal windows because there are no thermal bridges.
